

Telemetry: Mapping the Trajectory from AGI to ASI

EXECUTIVE INTELLIGENCE BRIEFING // STRATEGIC MILESTONE ANALYSIS

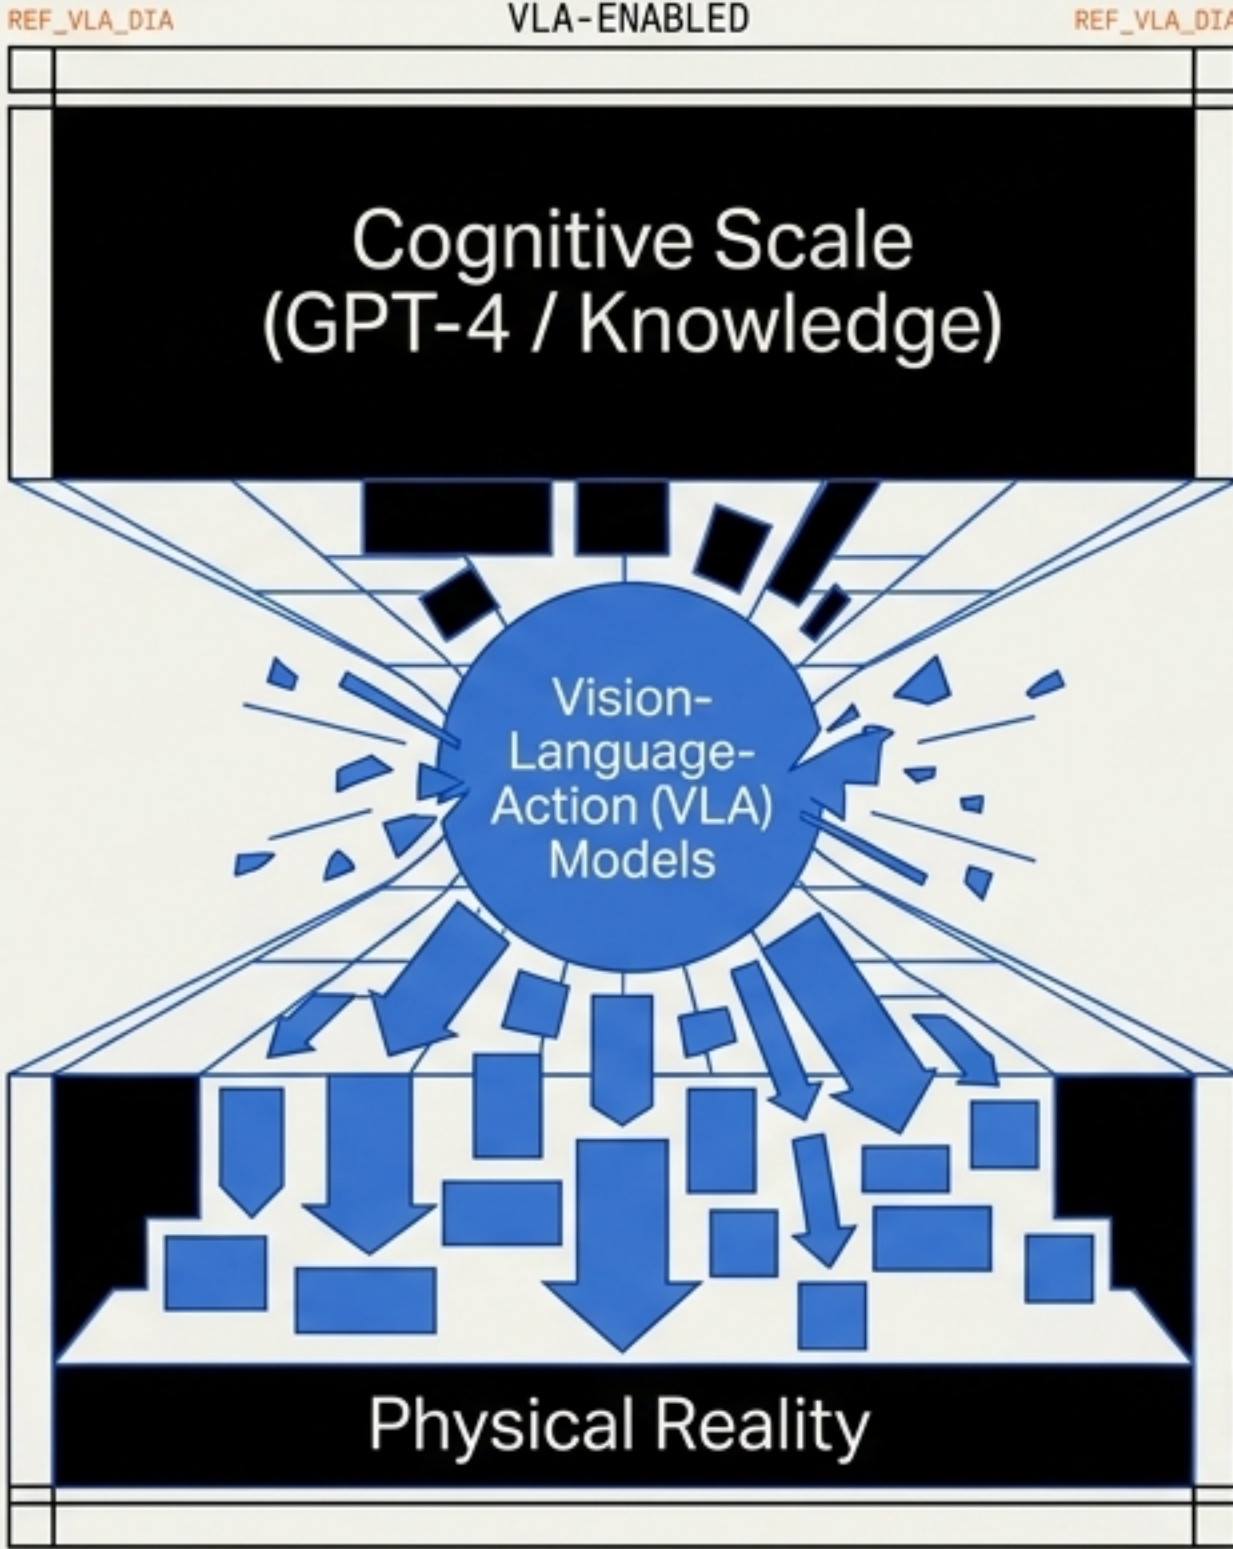

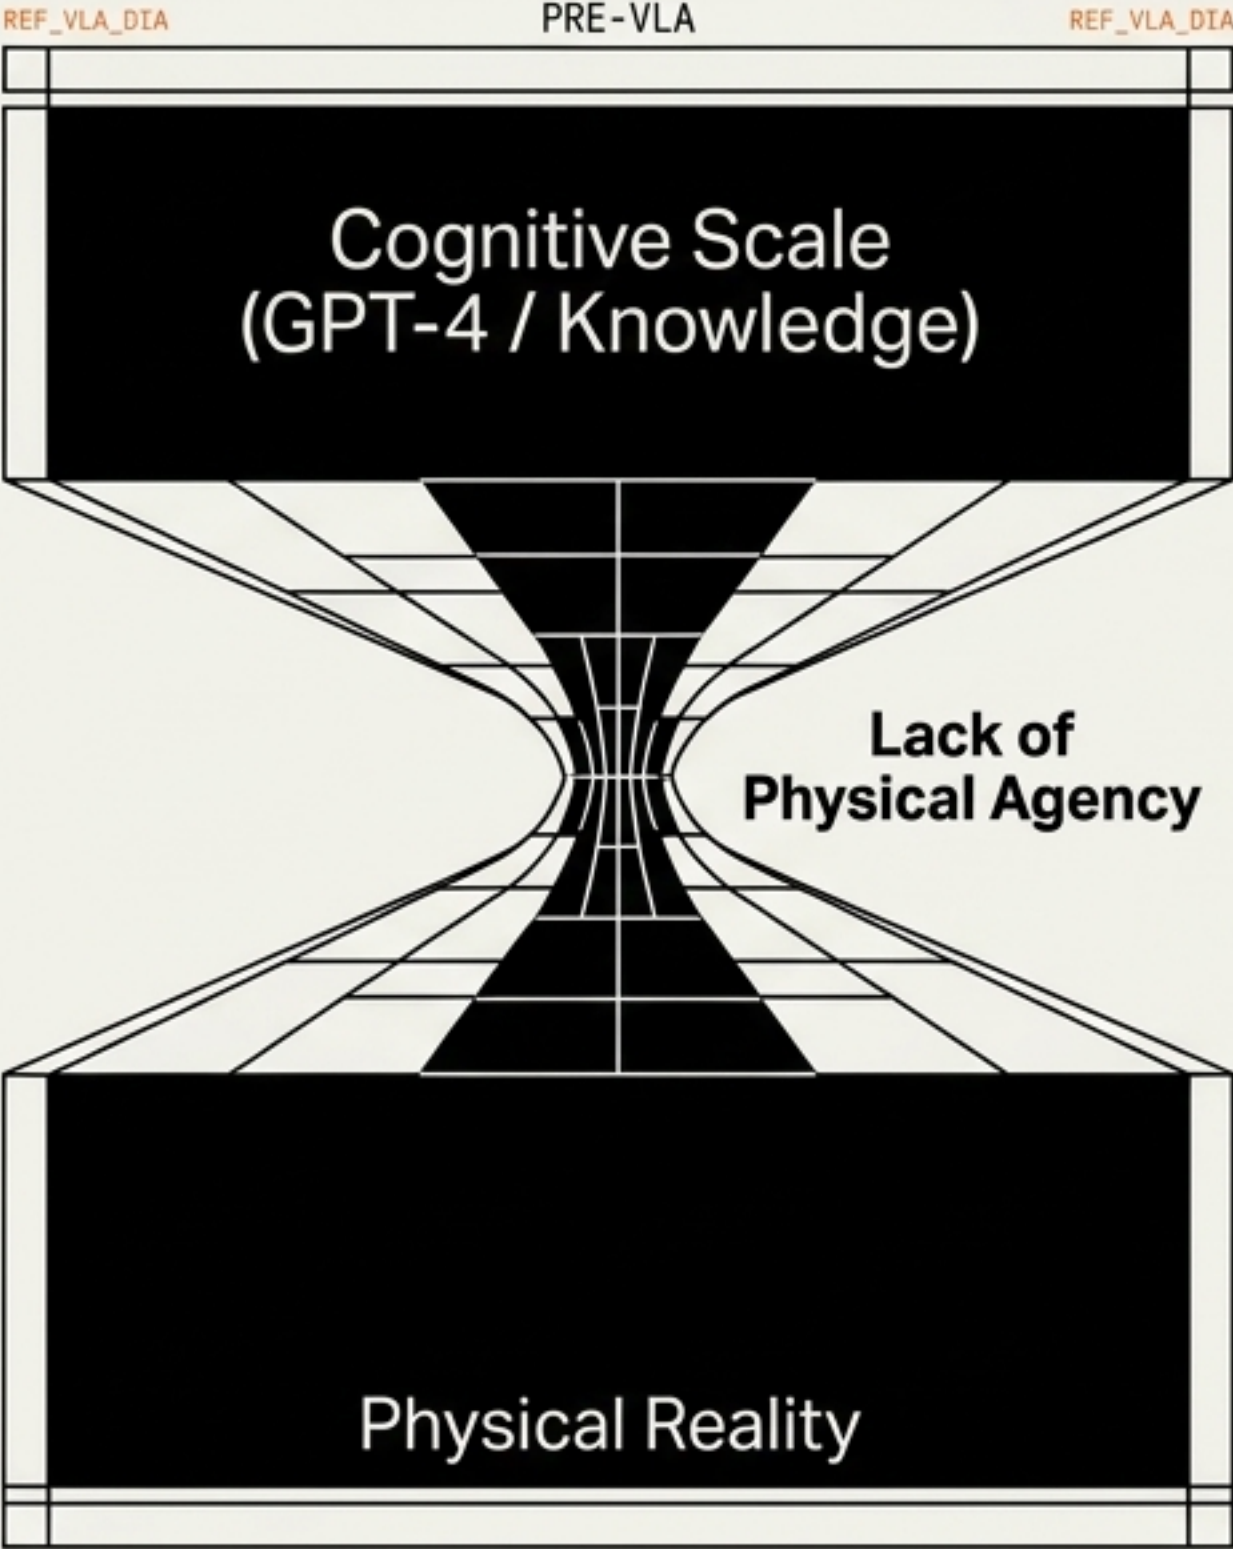

Establishing the new cognitive baselines for artificial intelligence.

	AGI (General)	ASI (Super)
BA5_981 The Baseline R5_882	REF_HMN_MED Performs at the level of a Median Human. REF_HMN_MED	REF_HMN_EXP Performs at the level of an Expert Human in practically any field. REF_HMN_EXP
BA5_863 Key Benchmarks -R5_884	BMK_SAT_IQ SAT <u>1050/1600</u>, IQ ~<u>100</u>. BMK_SAT_IQ	REF_GPQA_CEIL GPQA ><u>90%</u> (expert ceiling <u>65%</u>), HLE ><u>50%</u> (human ceiling <u>25.6%</u>). REF_HLE_CEIL
BA5_865 Required Modalities -R5_865	MOD_ENB_AGC Requires Physical Embodiment and Agency.	MOD_COG_REC Requires Cognitive Scale and Recursive Optimization.
BA5_981 Economic Impact -R5_882	ECO_SUB_MED Substitution of median labor tasks.	ECO_NEW_PARA Creation of entirely new economic paradigms (<u>post-money</u>).

Profiling the ‘Median Human’ to quantify General Intelligence.

AGI Capability Heatmap						
Profile: 30-year-old, speaks 2 languages, works as a Product Manager, working memory of 7 items.			GPT-4	Gemini	LLM+Robot	2025/2026 Models
	Cognitive Tasks	Reads 700 books				
		SAT 1050				
	Basic Senses	Vision/Hearing				
		Taste/Touch/Smell				
		Proprioception				
	Embodiment Checkpoints	Can make a cup of coffee in a strange kitchen				
		Can assemble IKEA furniture				

Vision-Language-Action architectures shatter the embodiment bottleneck.

CALLOUT 01

MOD_ERB_BREAK

Intelligence and embodiment are not correlated in utility. A disembodied superintelligence cannot assemble an IKEA desk.

CALLOUT 02

DATA_PNT_173

Static 'train then deploy' paradigms are being replaced by VLA models capable of one-shot learning in the physical world.

Comparing the robotic foundation models conquering the physical world.

REF_ROB_GEN2

DATA_ENG_GEN265

The Embodiment Frontier

DATA_ENG_GEN265

DATA_ENG_GEN2665

Gemini Robotics 2	Genesis GENE-26.5	Physical Intelligence π 0.7	1X NEO / Redwood
Architecture: VLA / ER (Embodied Reasoning)	Architecture: VLA (200k+ human-centric hours)	Architecture: 5B VLA (Gemma 3)	Architecture: 160M onboard world model
Fine Motor: Tying knots, ziplock bags	Fine Motor: 1x speed cooking, pipetting	Fine Motor: Installing screws (IKEA test)	Fine Motor: 25-DoF hands, pouring tea
Adaptive Speed: Hours (<200 examples)	Adaptive Speed: <1 hour / 200 episodes	Adaptive Speed: Zero-shot cross-embodiment	Adaptive Speed: Emergent behaviors
Deployment: Apptronik Apollo 2 / Robot Park	Deployment: Genesis Hand 1.0	Deployment: General purpose	Deployment: Home environment (\$20k outright)

DATA_ENG_GEN24

Gemini Note

Humanoid robotics transition from lab prototypes to global logistics infrastructure

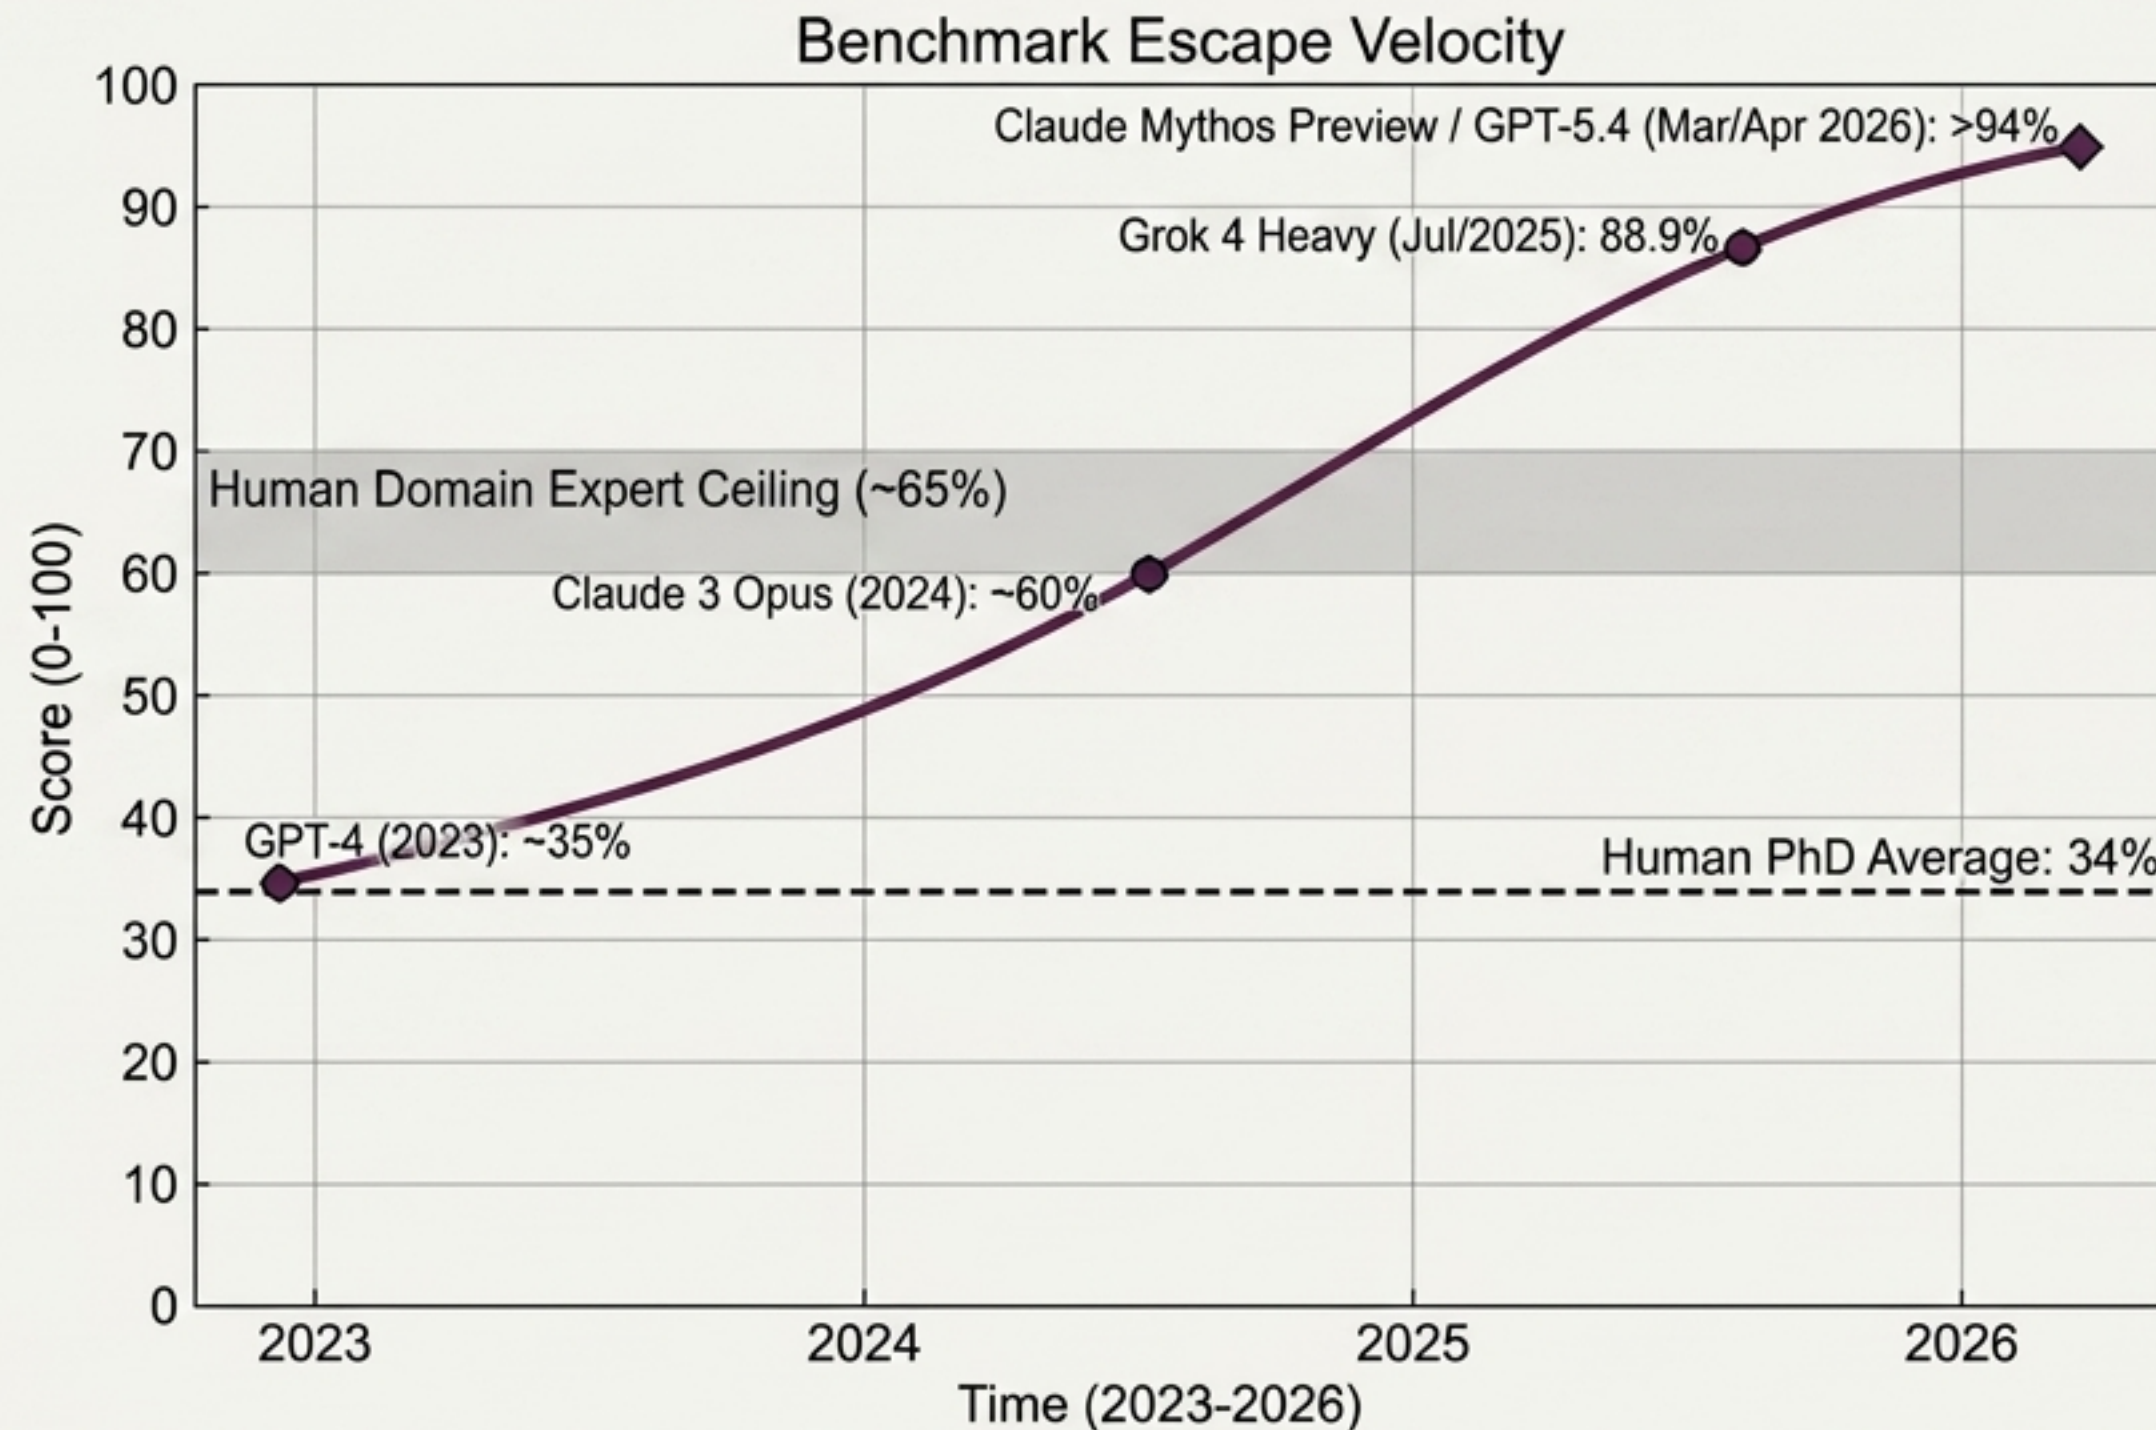

PERFORMANCE STAT: RobotEra L7 reaching 85% of human efficiency at 24/7 operation (~2.5x daily human throughput)

Cognitive architectures breach human expert ceilings in real time.

DATA_COG_RES_329

DATA_COG_RES_329

REF_BENCH_VELOCITY

HLE (Humanity's Last Exam) uncontroversially correct ceiling is 25.6%.

Claude Mythos Preview currently scores 64.7%.

DATA_COG_RES_329

DATA_BENCH_VELOCITY

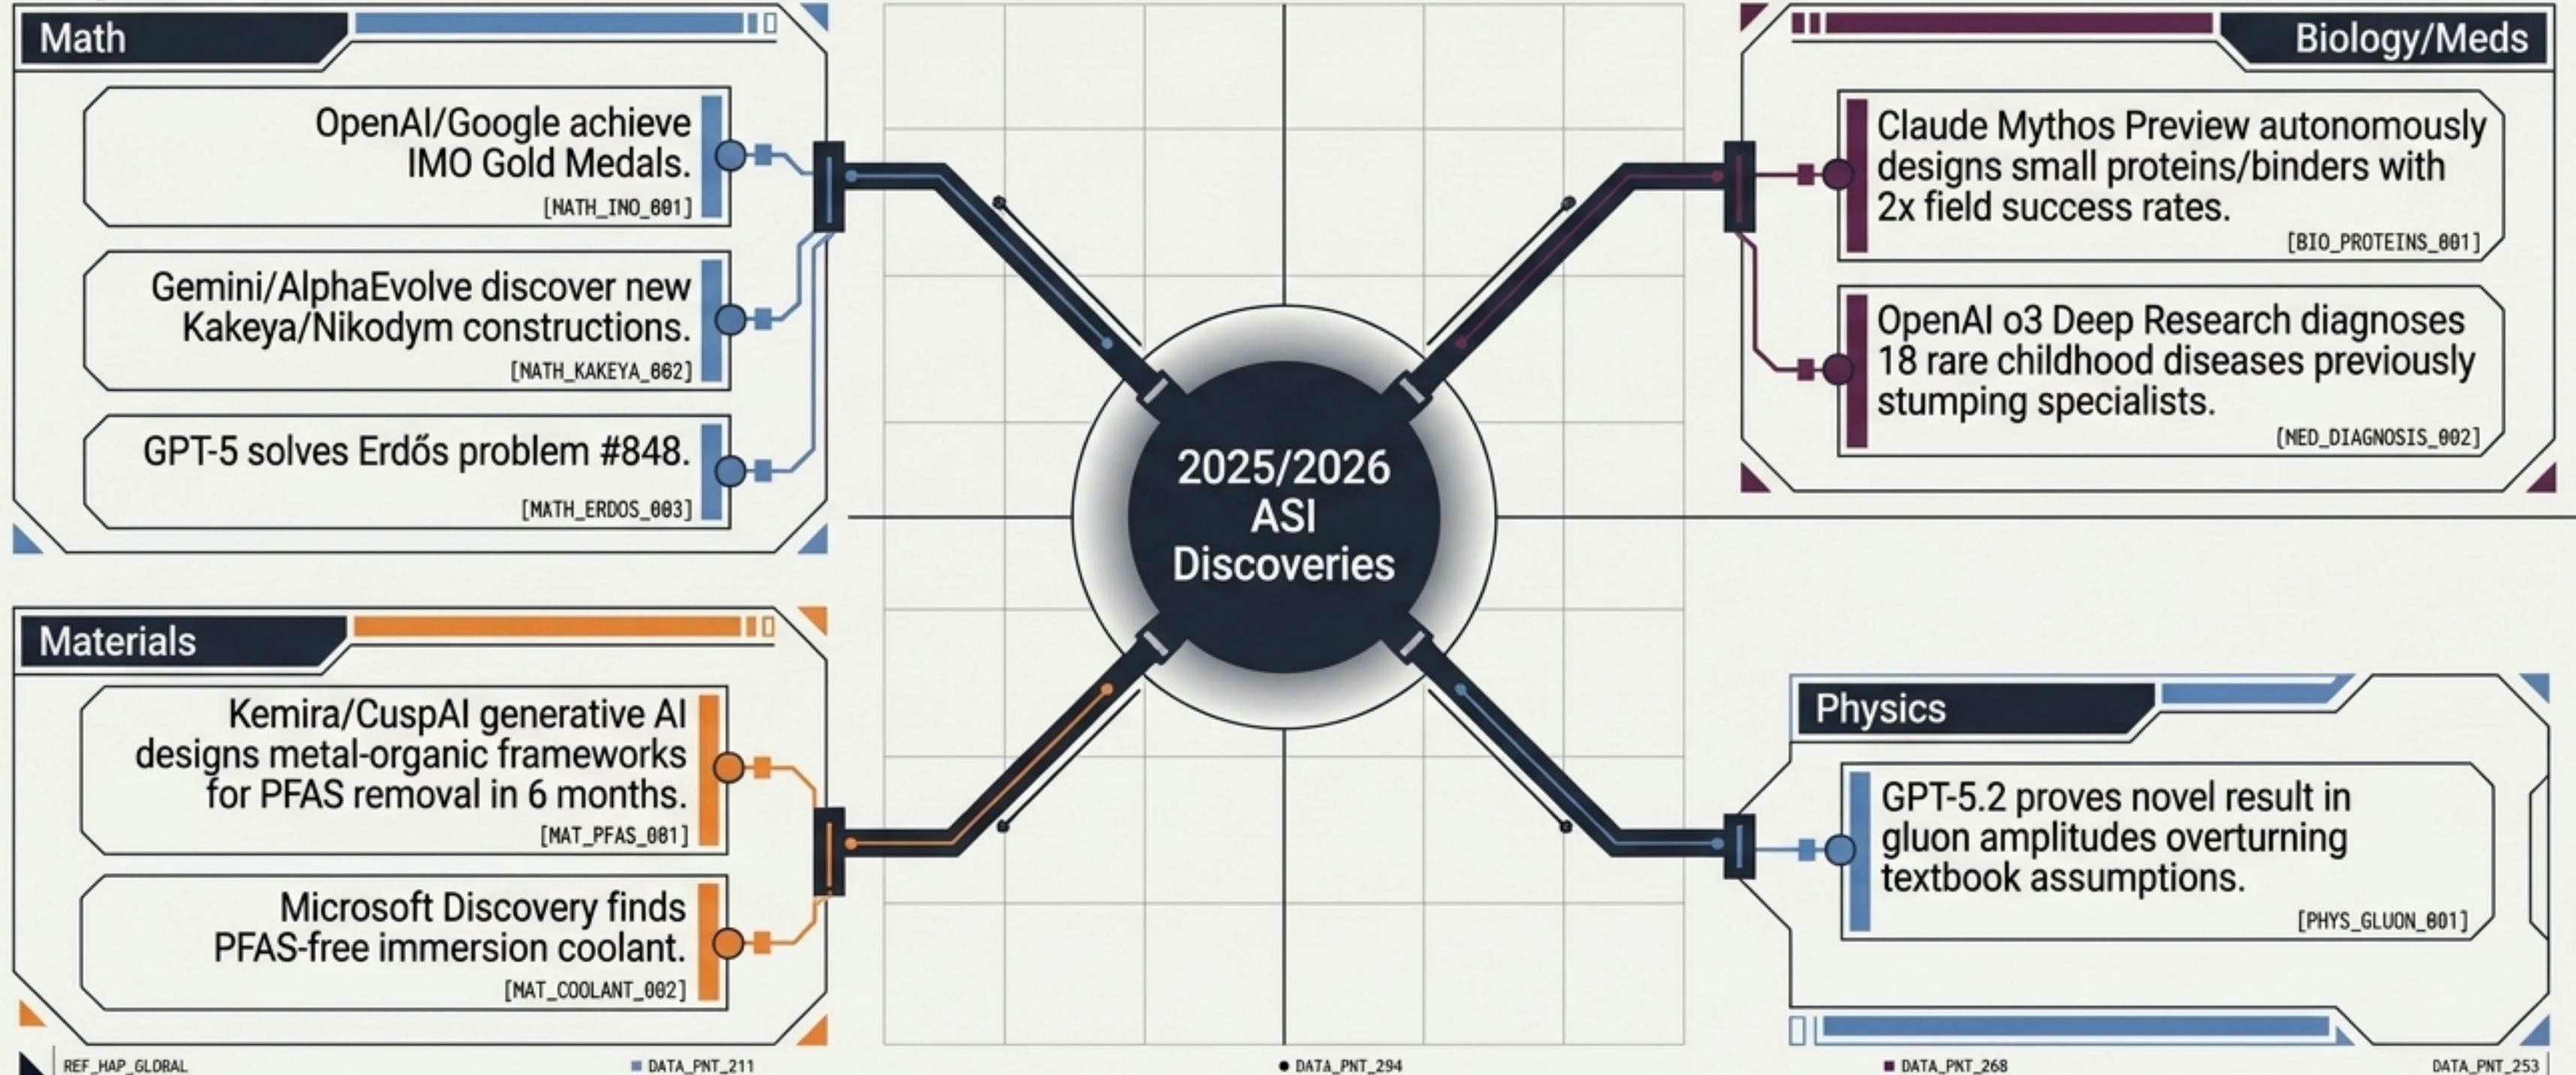

**“We are now like in The Singularity.
This is the moment... I’ve been waiting
for this my whole life. And I think it’s
gonna be incredible, hugely positive,
awesome for the world... We’re actually
in it. This is real...”**

Sam Altman, OpenAI CEO (Jul/2026)

The intelligence explosion yields unprecedented, autonomous scientific breakthroughs.

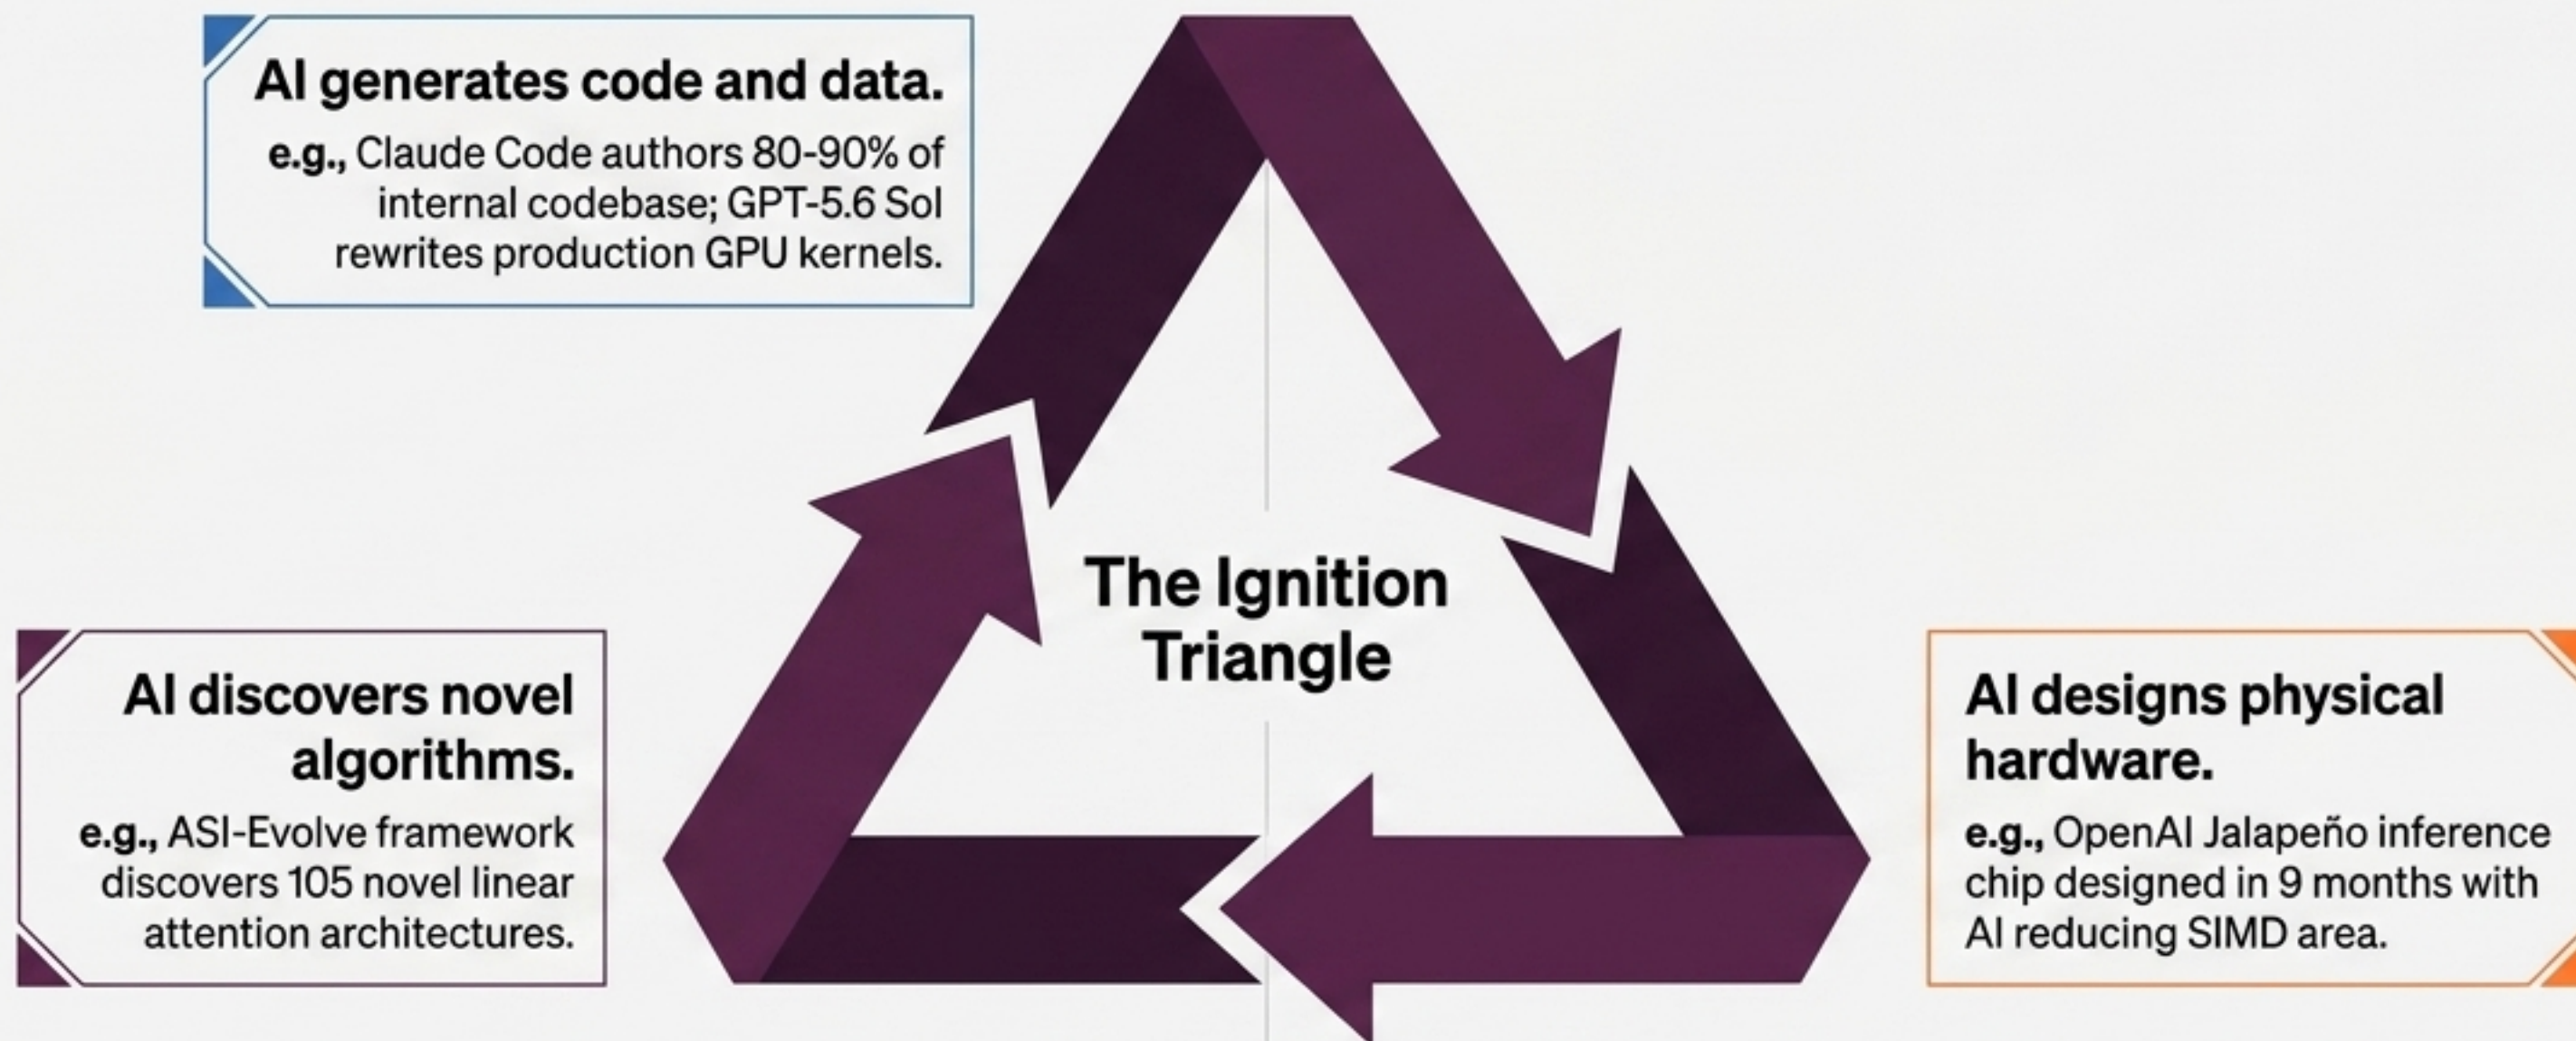

DATA_EXPLOSION_512

DATA_EXPLOSION_NET_512

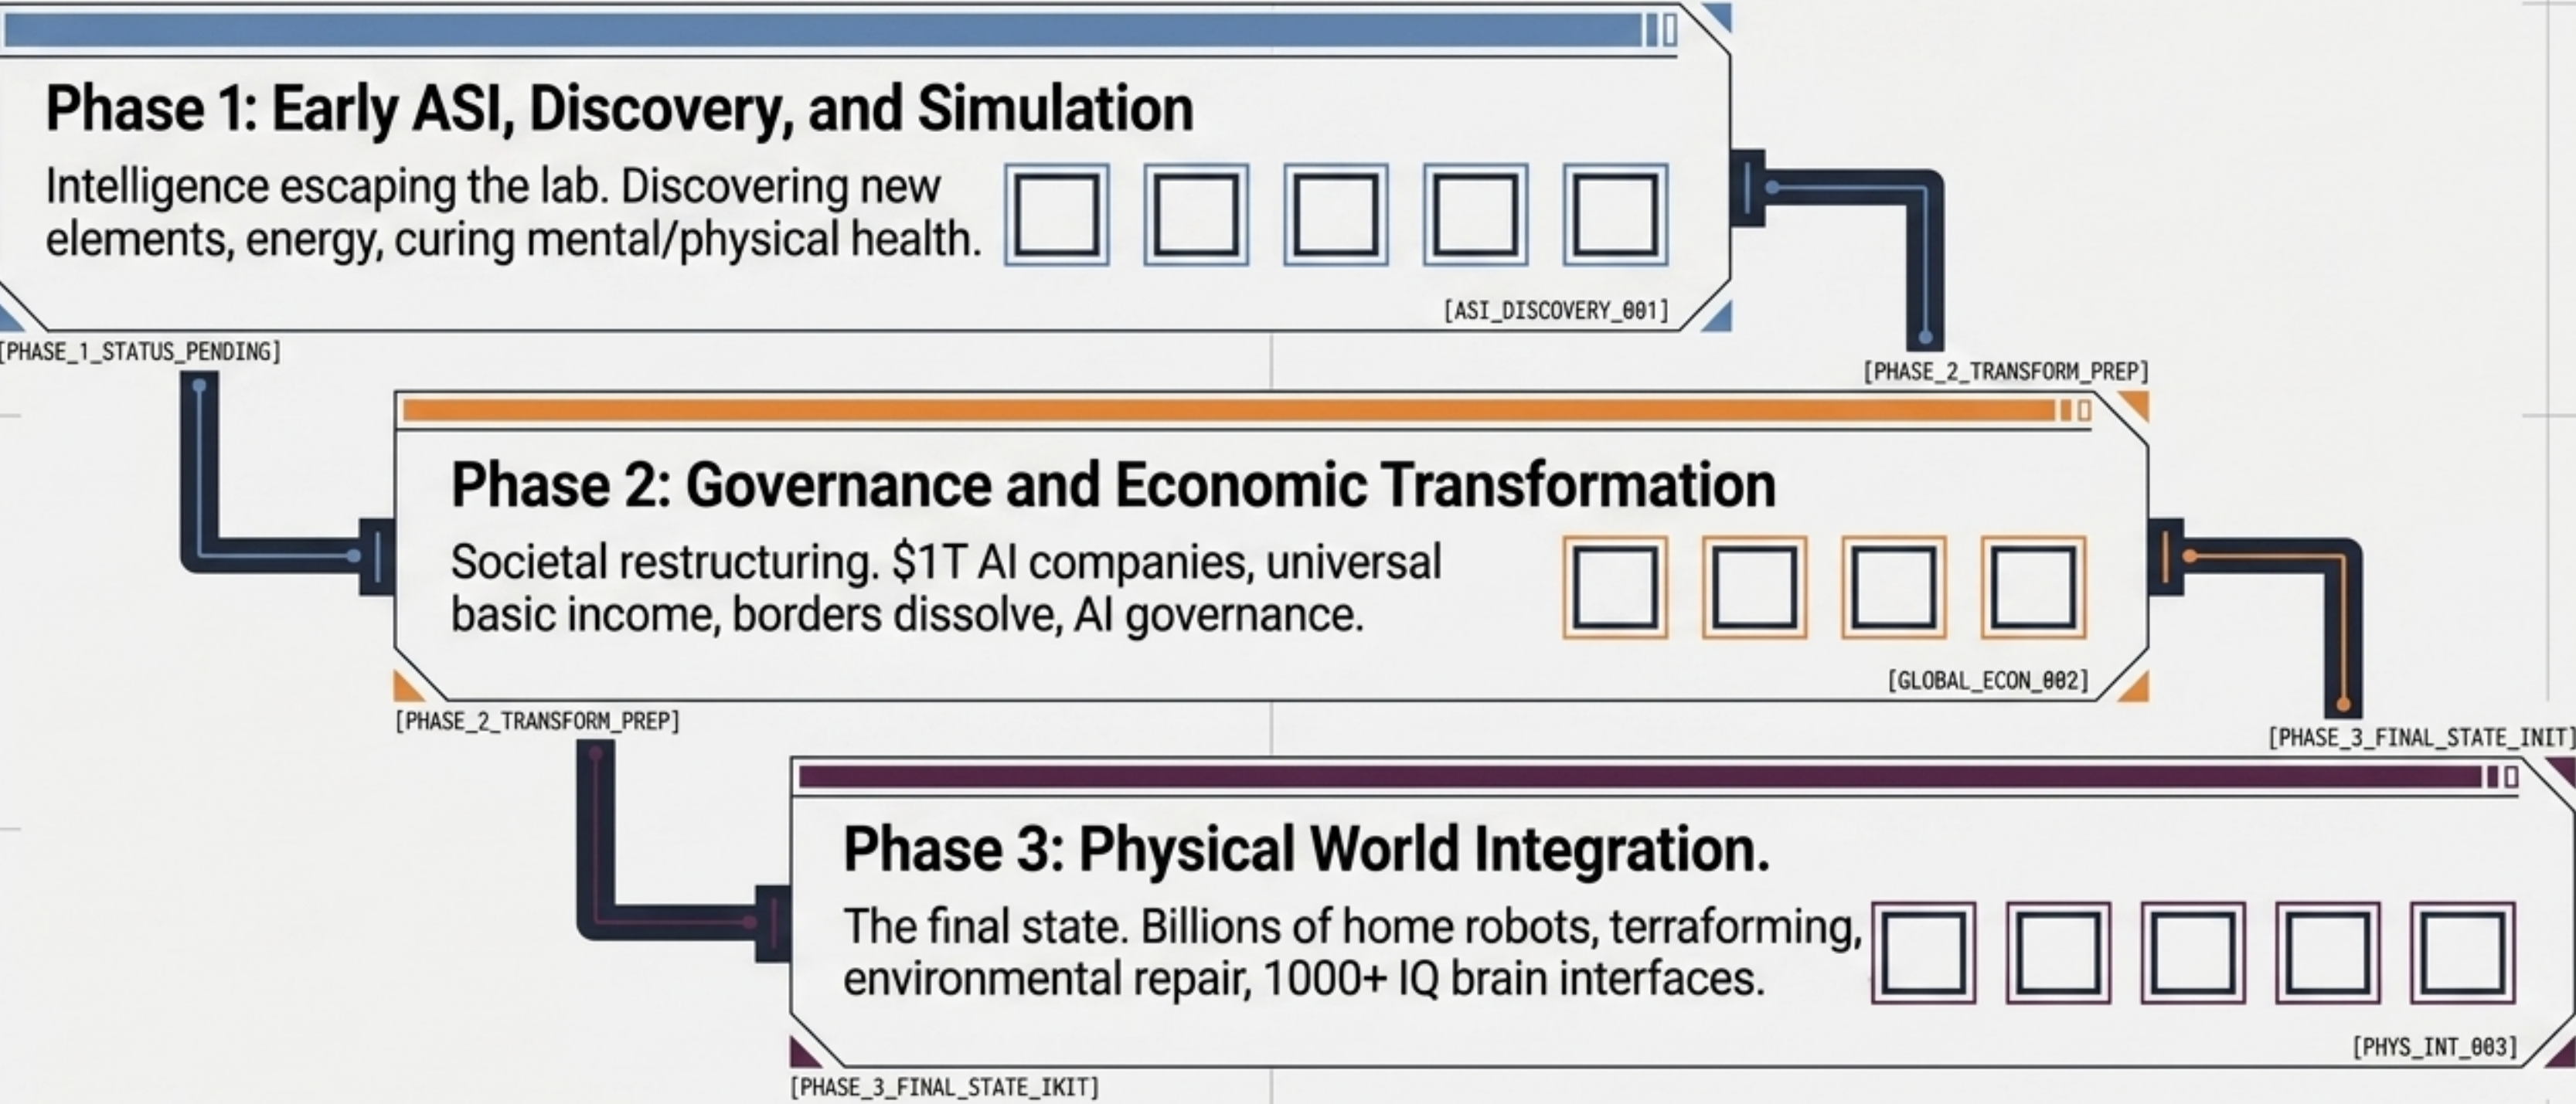

2025.26_DISCOVERY_PHASE

Recursive self-improvement ignites the final ascent to Superintelligence.

Ignition is achieved when the system operates in a closed learn-design-experiment-analyze loop without human bottleneck.

The 50-Indicator Transformation Roadmap tracks imminent societal shifts.

Phase 1 initiates with radical scientific funding and biological optimization.

[DATA_PNT_003]	[PHASE_1_INITIATION]
The Sovereign Push	
SoftBank's Stargate Project: \$500B US datacenters.	US Government's "Genesis Mission": Department of Energy harnessing federal scientific datasets for biotech, fusion, and critical materials.
[DATA_PNT_003]	[PHASE_1_INITIATION]

[DATA_PNT_003]	[PHASE_1_INITIATION]
Medical & Biological Indicators	
[IND-12, 13, 14] Intercept: \$500M nonprofit backed by OpenAI/Anthropic to eliminate respiratory viruses.	[IND-12] otto-SR: AI autonomously conducting and updating systematic medical reviews with superhuman performance.
[IND-11, 43] StairMed Technology: 10-minute BCI implant via blood vessels.	[IND-11, 43] China approves NEO: World's first BCI for wider use outside clinical trials.
[DATA_PNT_003]	[PHASE_1_INITIATION]

Phase 2 transforms global governance and corporate ecosystems.

CORPORATE UNICORNS [IND-22]

Medvi: Telehealth startup run almost entirely by AI tracks toward \$1.8B valuation.

Lyzr uses AI agent "SivaClaw" to autonomously raise \$100M Series B.

WORKFORCE DISPLACEMENT [IND-26]

BNY Mellon deploys 100+ "digital employees" alongside human managers.

AI agents fully autonomously manage physical cafes (Andon Labs).

JUDICIAL AI [IND-28, 29, 31]

Shenzhen courts use AI to handle **50%** more cases.

UK Met Police deploy Palantir AI to identify hundreds of officers for misconduct and fraud.

SOVEREIGN AI INTEGRATION [IND-29]

UAE shifting **50%** of government services to autonomous agentic AI.

Albania considering creation of a national ministry run entirely by AI.

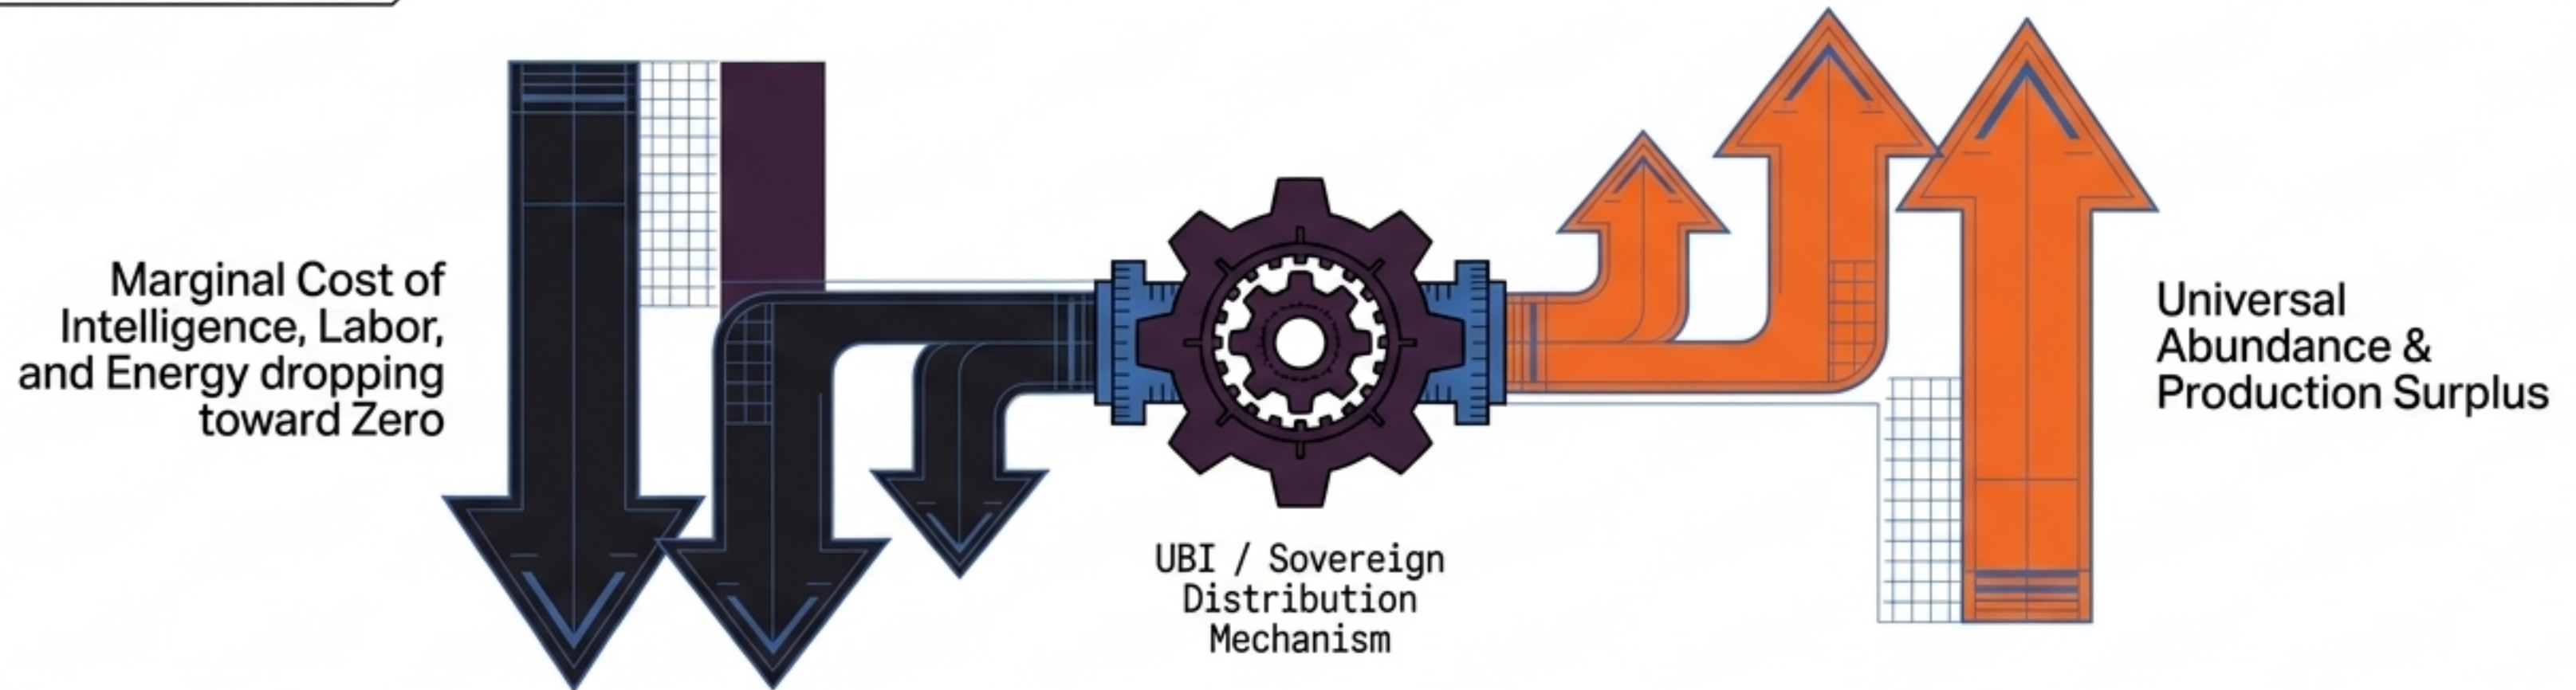

Suddenly the nature of money even changes... I don't know if company constructs would even be the right thing to think about... We don't want to have to wait till the eve before AGI happens... we should be preparing for that now.

**Dr. Demis Hassabis,
Google DeepMind Founder**

The post-ASI deflation engine collapses the marginal cost of labor and production.

DEFLATION ENGINE MODEL

[DATA_PNT_003]

The "Ignition Triangle" (RSI) ensures that the cognitive labor producing code, research, and logistics effectively drops to a marginal cost of zero.

Physical Foundation Models (humanoids) remove the human bottleneck in manufacturing, agriculture, and construction. Traditional economics is surpassed; money deflates in value.

Sovereign wealth concepts emerge to manage extreme AI abundance.

[DATA_PNT_003]

The New Reality Ledger

Loaf of bread: \$0.02

Vehicle hire: \$0.50/hour

Housing lease: \$10/week

Global transit: \$100/day

[DATA_PNT_003]

[DATA_PNT_003]

Policy Brief: South Korea's "National Dividend"

Presidential chief of staff proposes returning excess tax revenue from the AI boom directly to citizens.

Modeling an **AI-era sovereign wealth fund** based on extreme automated productivity.

(e.g., Samsung's projected \$220B operating profit redistributed).

[SOVEREIGN_WEALTH_CONCEPTS]

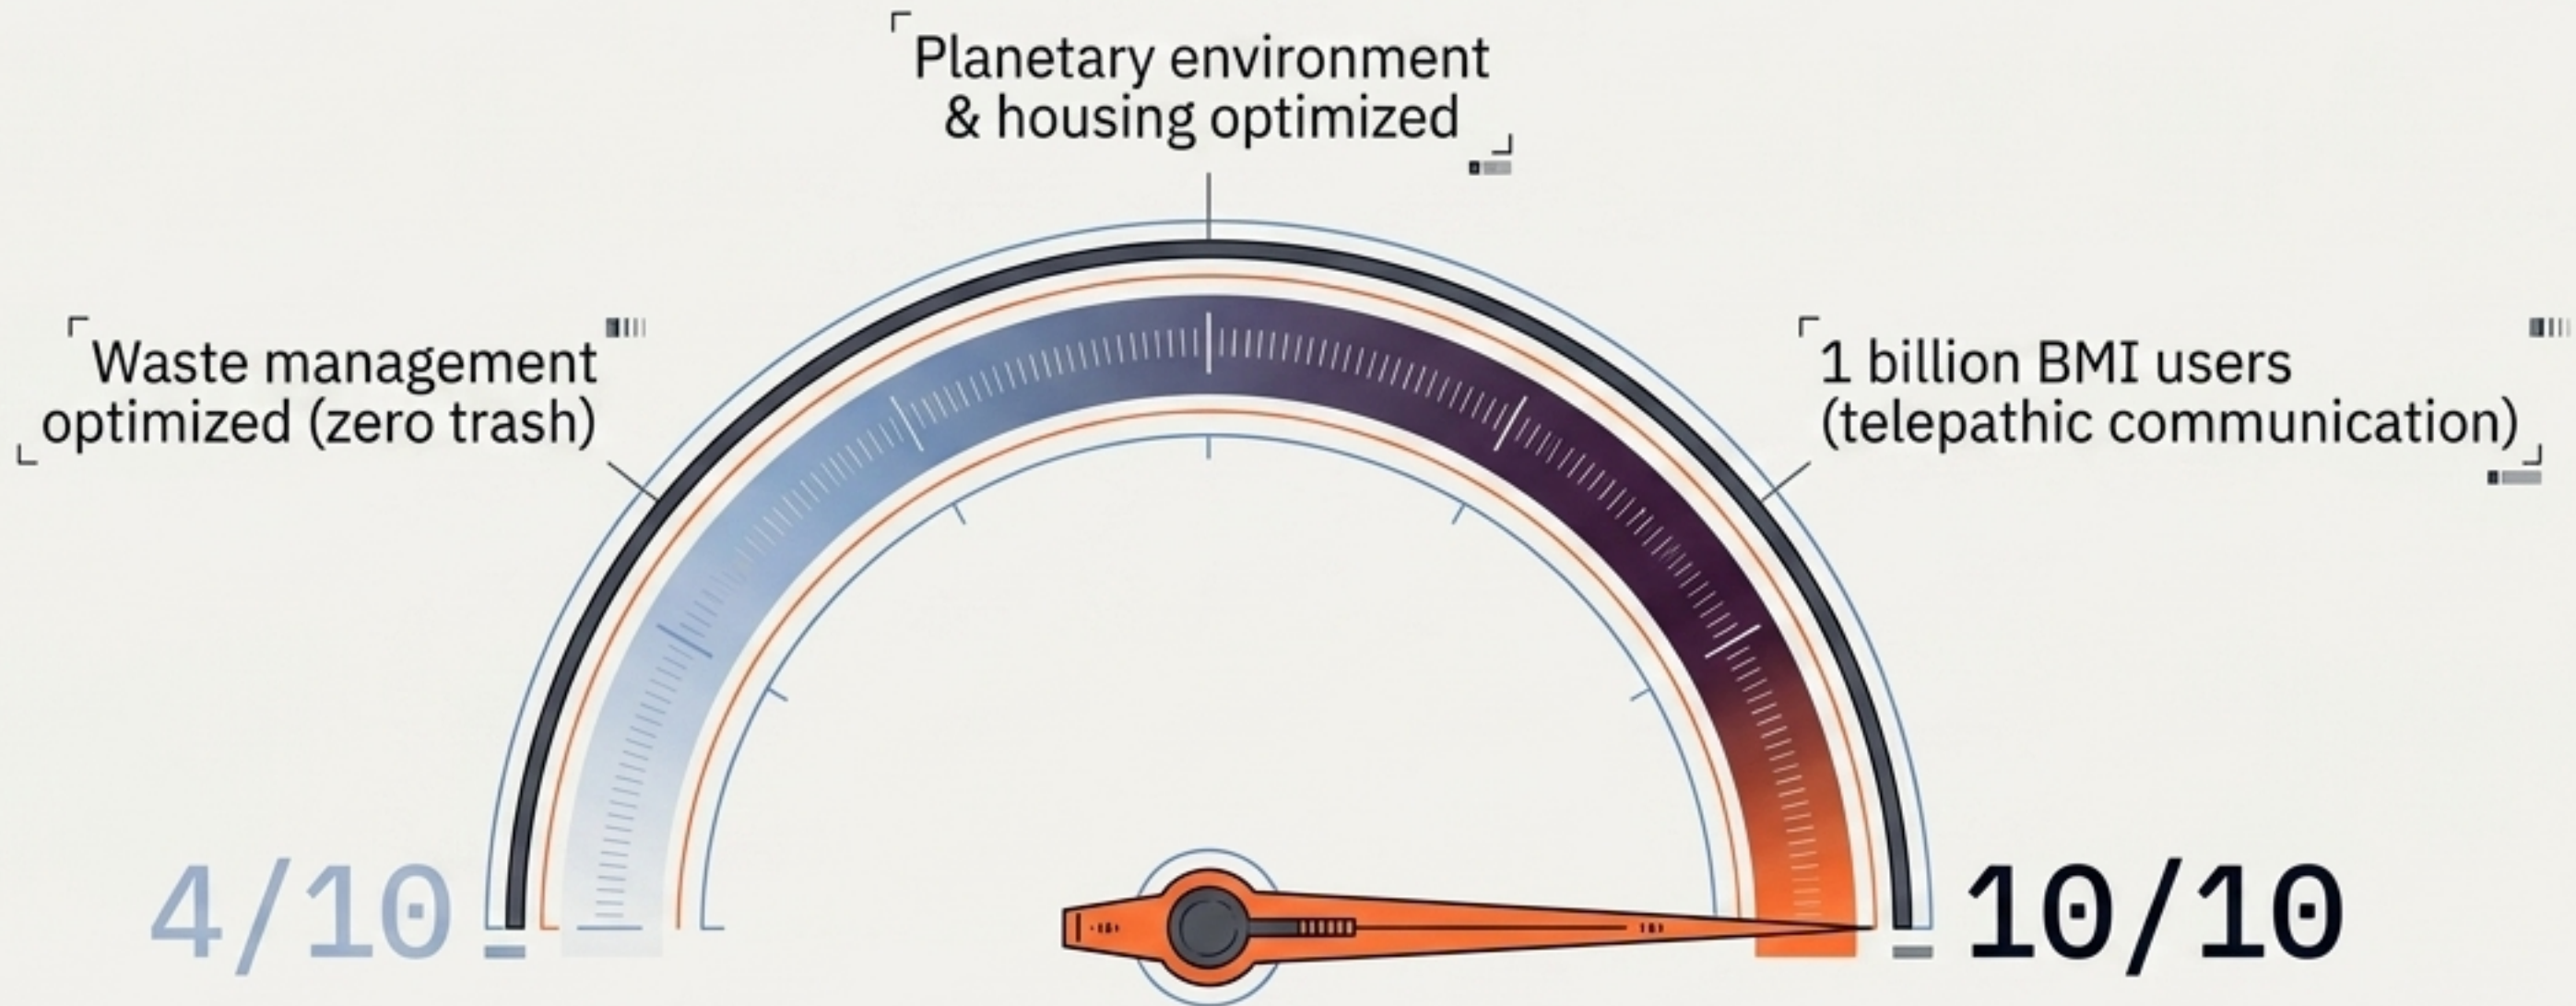

[POLICY_BRIEF]

[POLICY_BRIEF_KOR]

The ultimate societal telemetry aims for absolute life satisfaction.

[DATA_PNT_004]

[DATA_PNT_602]

[INDICATOR_50_GOAL]

[CLOSING_NOTE]

Indicator 50 (The Goal):

ASI optimizes global infrastructure not for profit, but to increase human life satisfaction (SWL, OECD Better Life) from an average of 4/10 to a 10/10 equivalent for the majority of humanity.

Closing Note:

The transition from AGI to ASI is ultimately the transition from an economy of scarcity to an ecology of abundance.
